Allowable Subject Matter

1. Claims 1-23 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The prior art taken singly or in combination does not teach or suggest, a graphics system for processing pixel data associated with a predetermined pixel region, among other things, comprising

a controller configured to set a fill check-bit associated with said pixel region where the values of all pixels within said pixel region are the same as said data representing said predetermined reference pixel (claims 1 and 21).

a controller configured to check a fill check bit that is associated with a pixel region, to determine whether it is set to indicate that all pixel data within said pixel region is the same as a predetermined reference pixel that is associated with said pixel region (claims 8 and 22).

The closest prior art, reference Shino (U.S. Patent No. 6,466,219) teaches storing and retrieving pixel block, and setting flag bit indicating change in pixel region. Reference Shino also teaches associating a reference pixel in the pixel region for storing and retrieving.

However, reference Shino and does not teach setting/checking a fill check bit when pixel data for each pixel in the pixel region is the same as pixel data for the reference pixel.
